Arabic: Native
English: Excellent

Anas Tariq

Front-End Developer | React Developer | MERN Stack Developer

Experience

Front-End Developer | Apr 2023 - Present

Reflex | Jiza, Egypt

- Developed a conference and chat system "iSpeaker" using WebRTC, WebSocket, and other open source libraries.
- Participated in building LMS and ecommerce websites.
- Worked with agile methodology.
- Initiated React projects using MVC architecture for a clean and maintainable codebase.
- Implemented a simple yet effective CI/CD pipeline using GitHub Actions to automate building, and deployment processes.
- Designed and developed a meeting conference feature, enabling seamless video and audio communication, screen sharing, and real-time collaboration.
- Created a real-time chat application, incorporating features such as instant messaging, online presence indicators, and real-time updates.
- Handled RESTful API requests and responses, utilizing reusable models and implementing error handling for robust API integration.
- Utilized Bootstrap, SASS, and CSS modules to style websites, achieving visually appealing and responsive layouts with a modular and scalable approach.

Front-End Developer | Jan 2019 - Mar 2021

EgyTwins | Jiza, Egypt

- Collaborated on website design using Figma.
- Developed and maintained responsive and dynamic front-end websites.
- Refactored legacy code to improve readability, and maintainability, and modernize the codebase.
- Responsible for developing an ERP system, an online game, and a CRM system. Tasks include overseeing project lifecycles, optimizing business processes, crafting immersive user experiences, and managing customer interactions.
